

Gross appearance of cerebral aneurysm of the circle of Willis

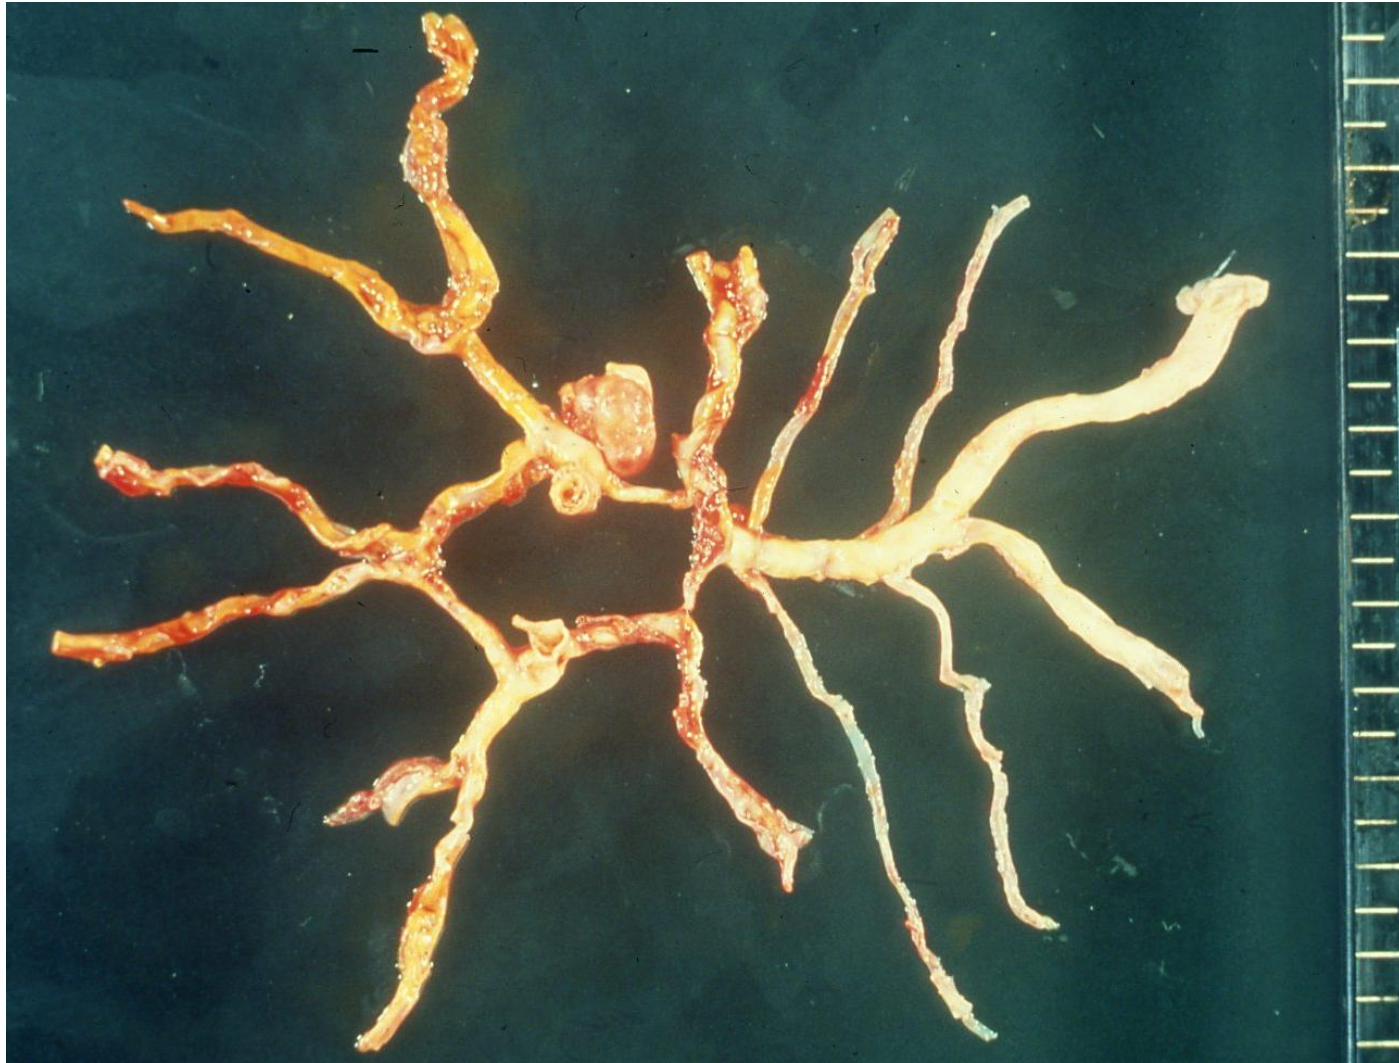

A variety of gross appearance of cerebral aneurysm causing lethal subarachnoid hemorrhage is shown.

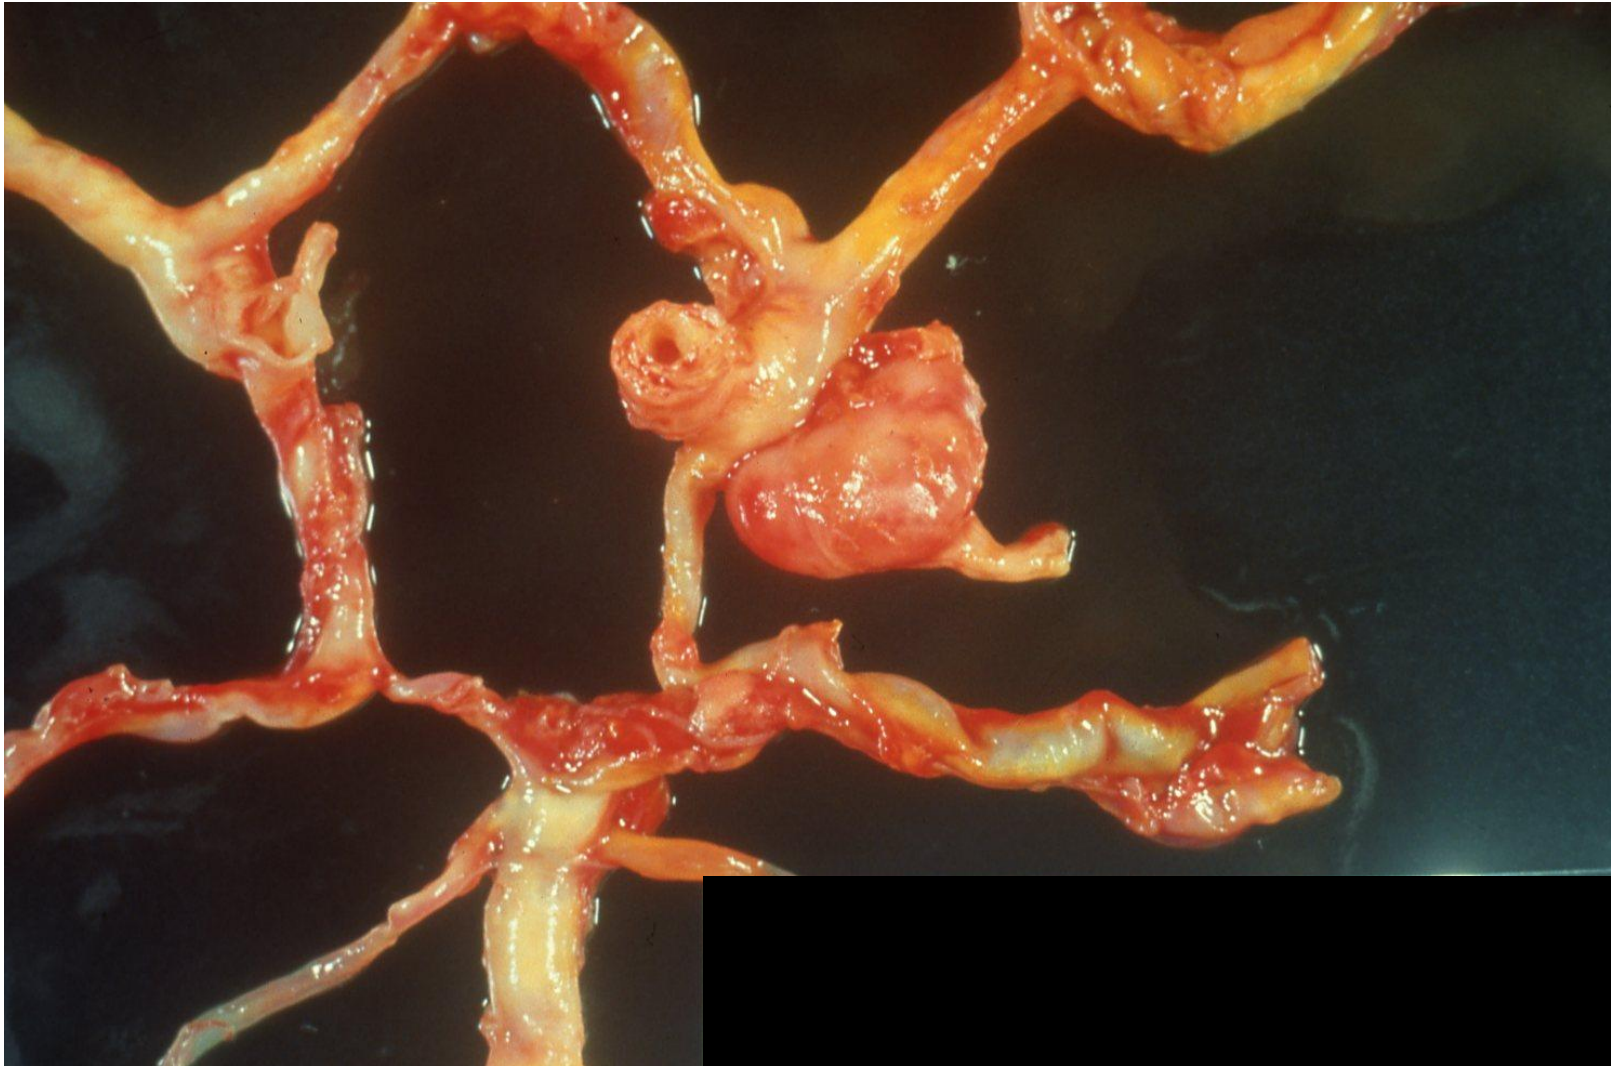

Subarachnoid hemorrhage (65M)

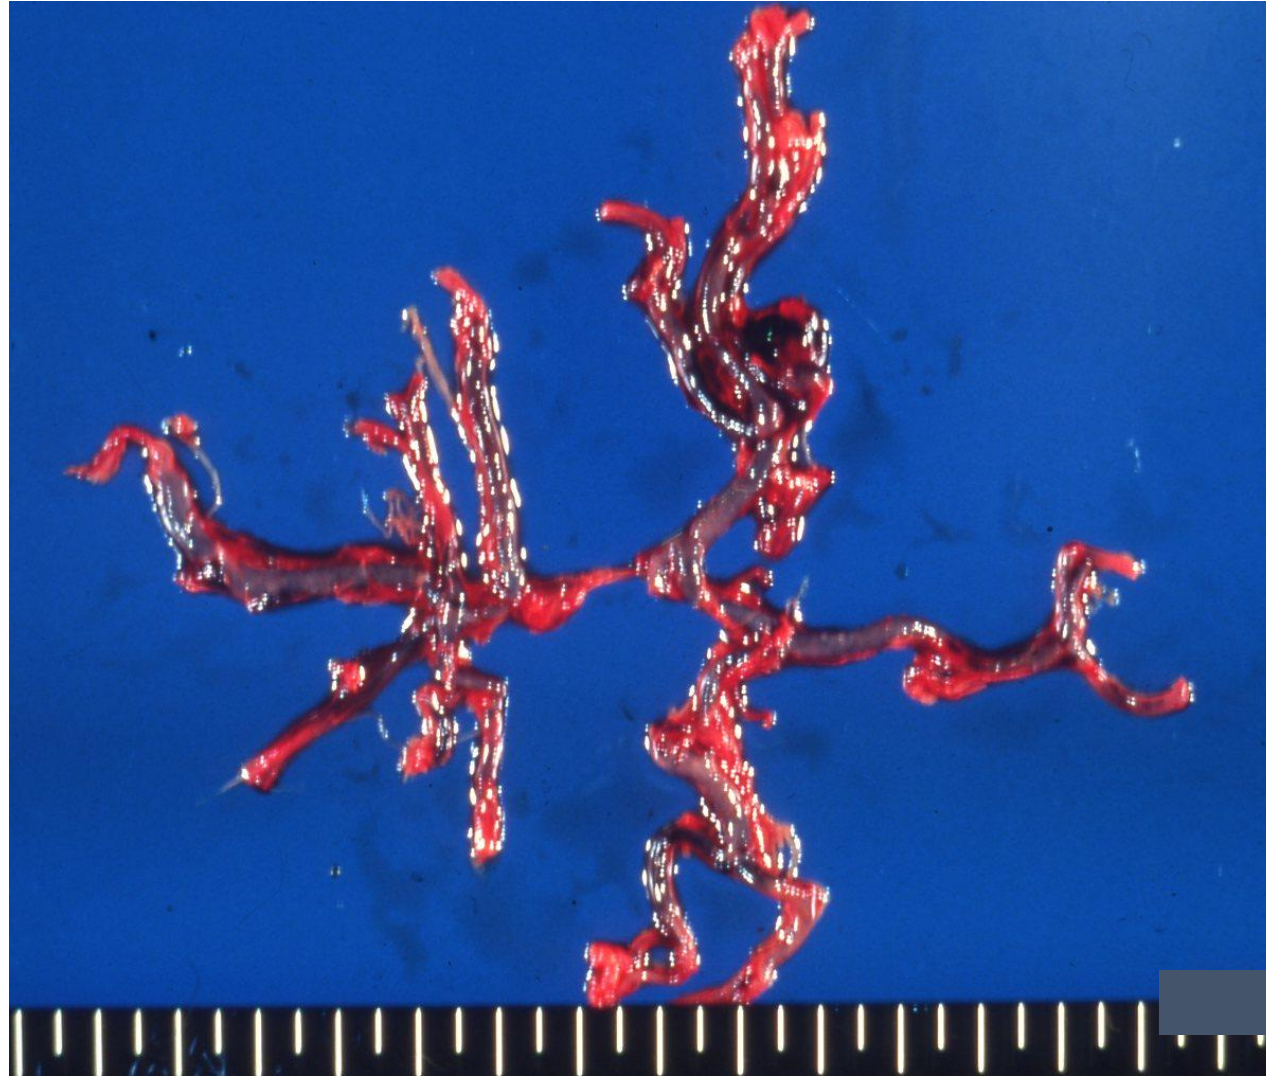

Subarachnoid hemorrhage, sagittal section (42M)

Left ICPC (internal carotid-posterior communicating artery) aneurysm, causing subarachnoid hemorrhage (60M)

Close-up view of Left ICPC (internal carotid-posterior communicating artery) aneurysm, causing subarachnoid hemorrhage (60M)

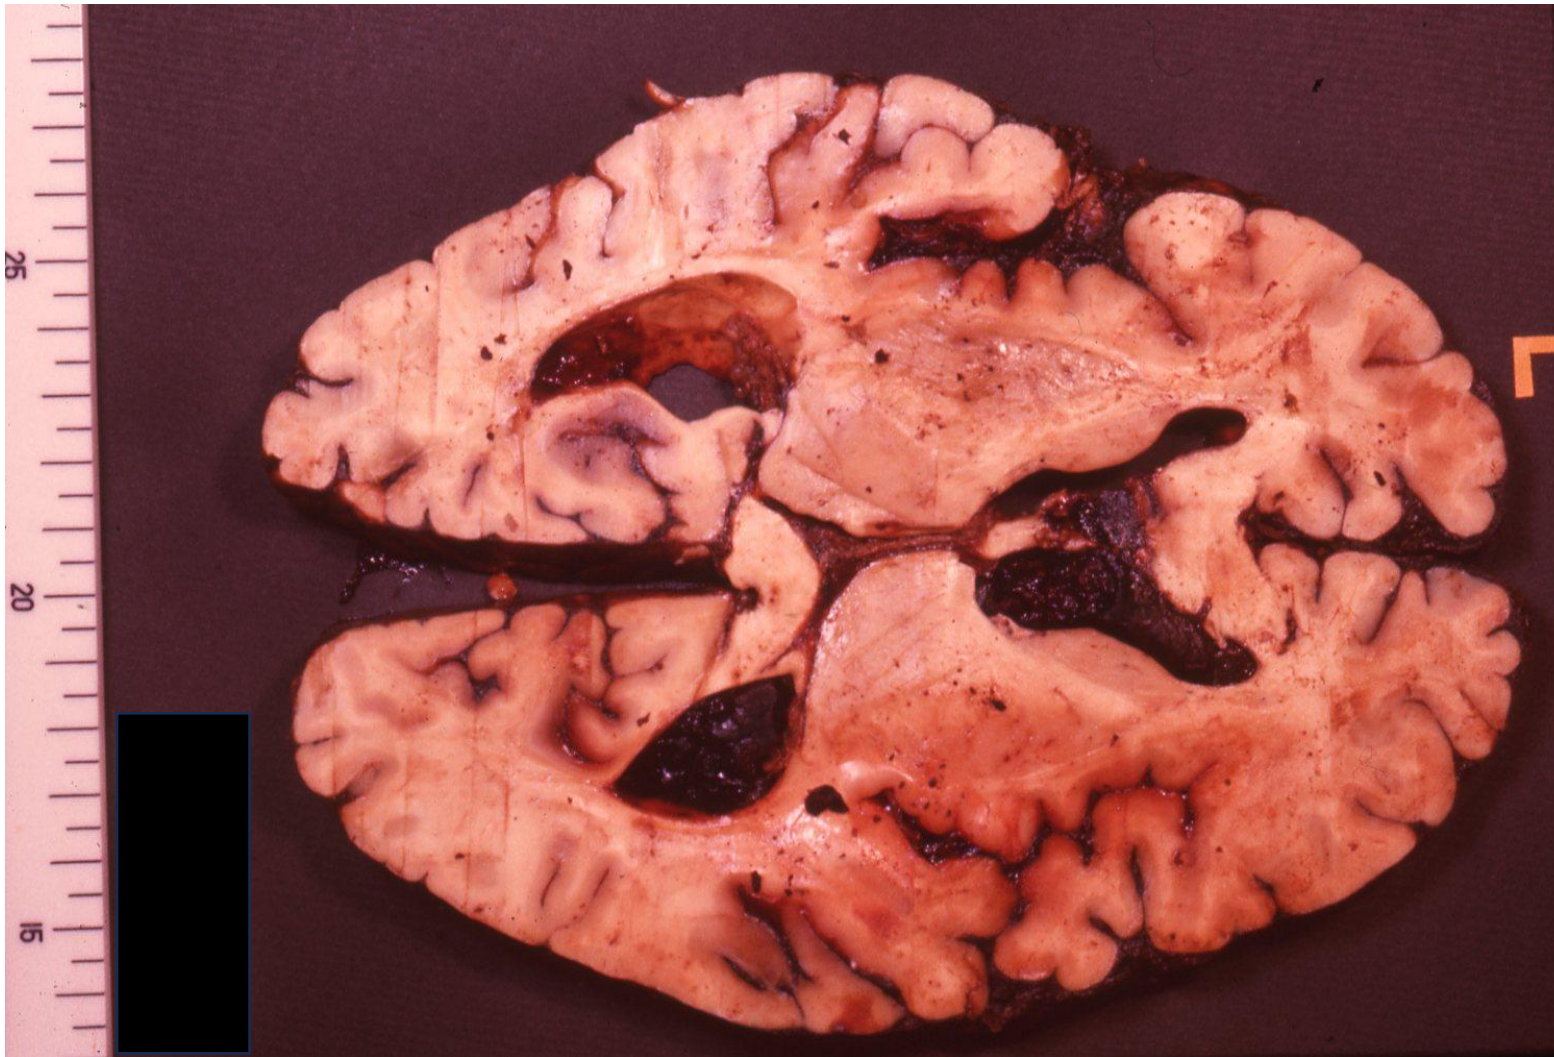

Left middle cerebral artery aneurysm, causing subarachnoid hemorrhage (45M)

Left middle cerebral artery aneurysm, causing intracerebral hemorrhage (48M)

Anterior communicating artery aneurysm, causing subarachnoid and intraventricular hemorrhage (66M)-1

Anterior communicating artery aneurysm, causing subarachnoid and intraventricular hemorrhage (66M)-2

Anterior communicating artery aneurysm, causing subarachnoid hemorrhage (72F)
