

Gross appearance of brain infarction

A variety of gross appearance of brain infarction is shown.

Fresh brain infarction of left middle cerebral artery area (75F)

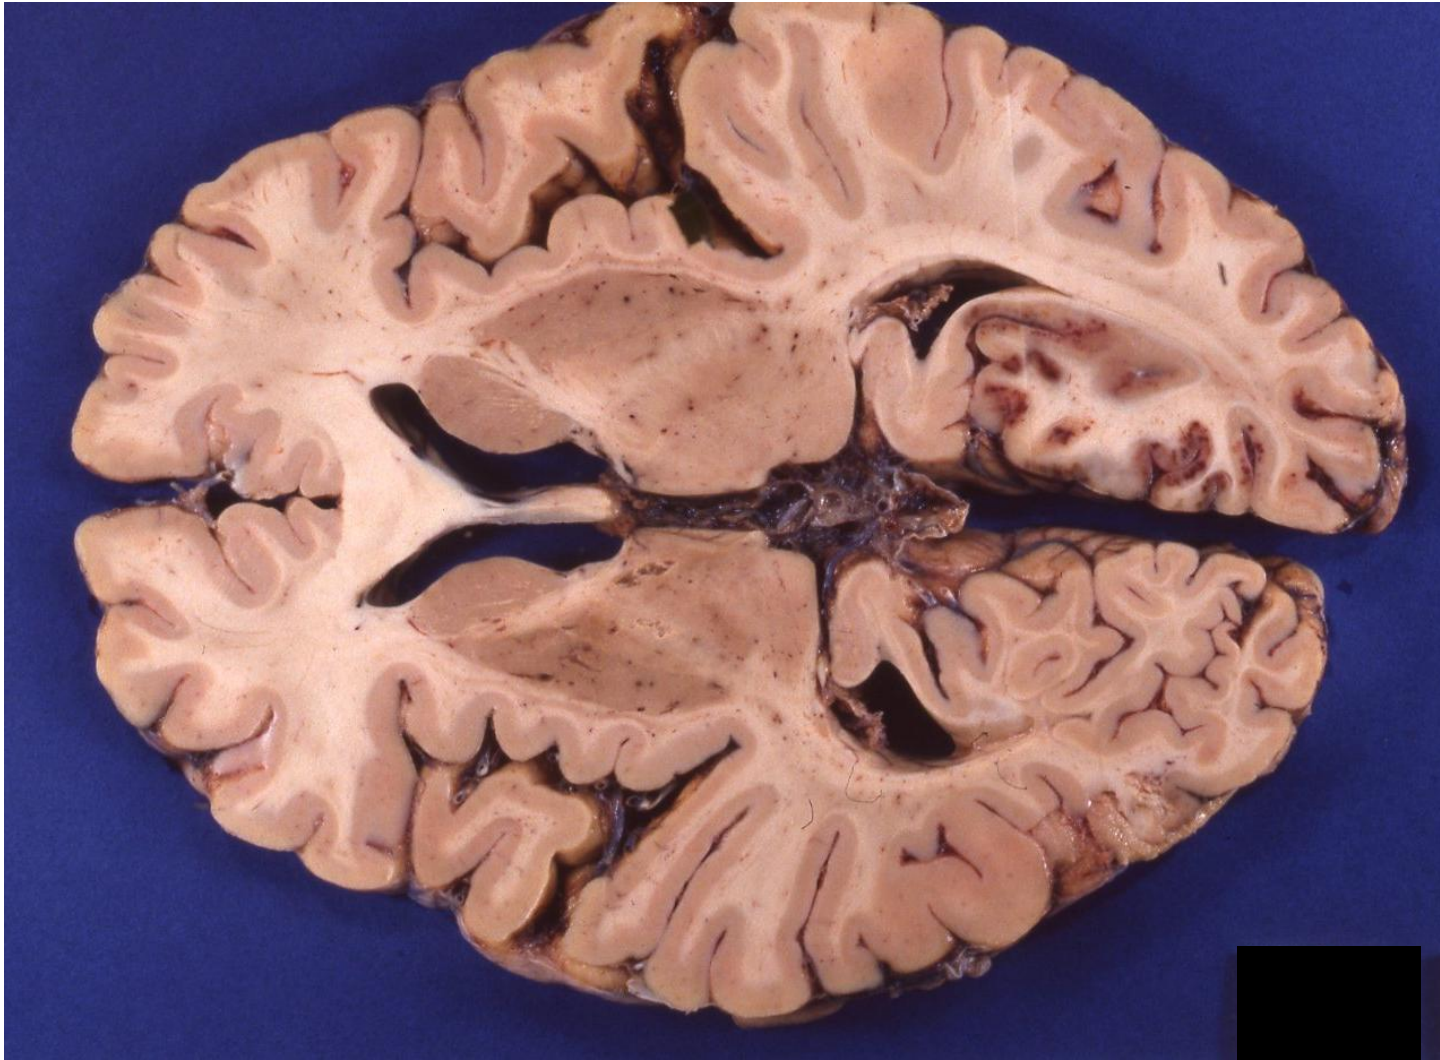

Fresh brain infarction of left middle cerebral artery area and remote infarction of right putamen (75F)

Fresh brain infarction of right internal carotid artery area (70F)

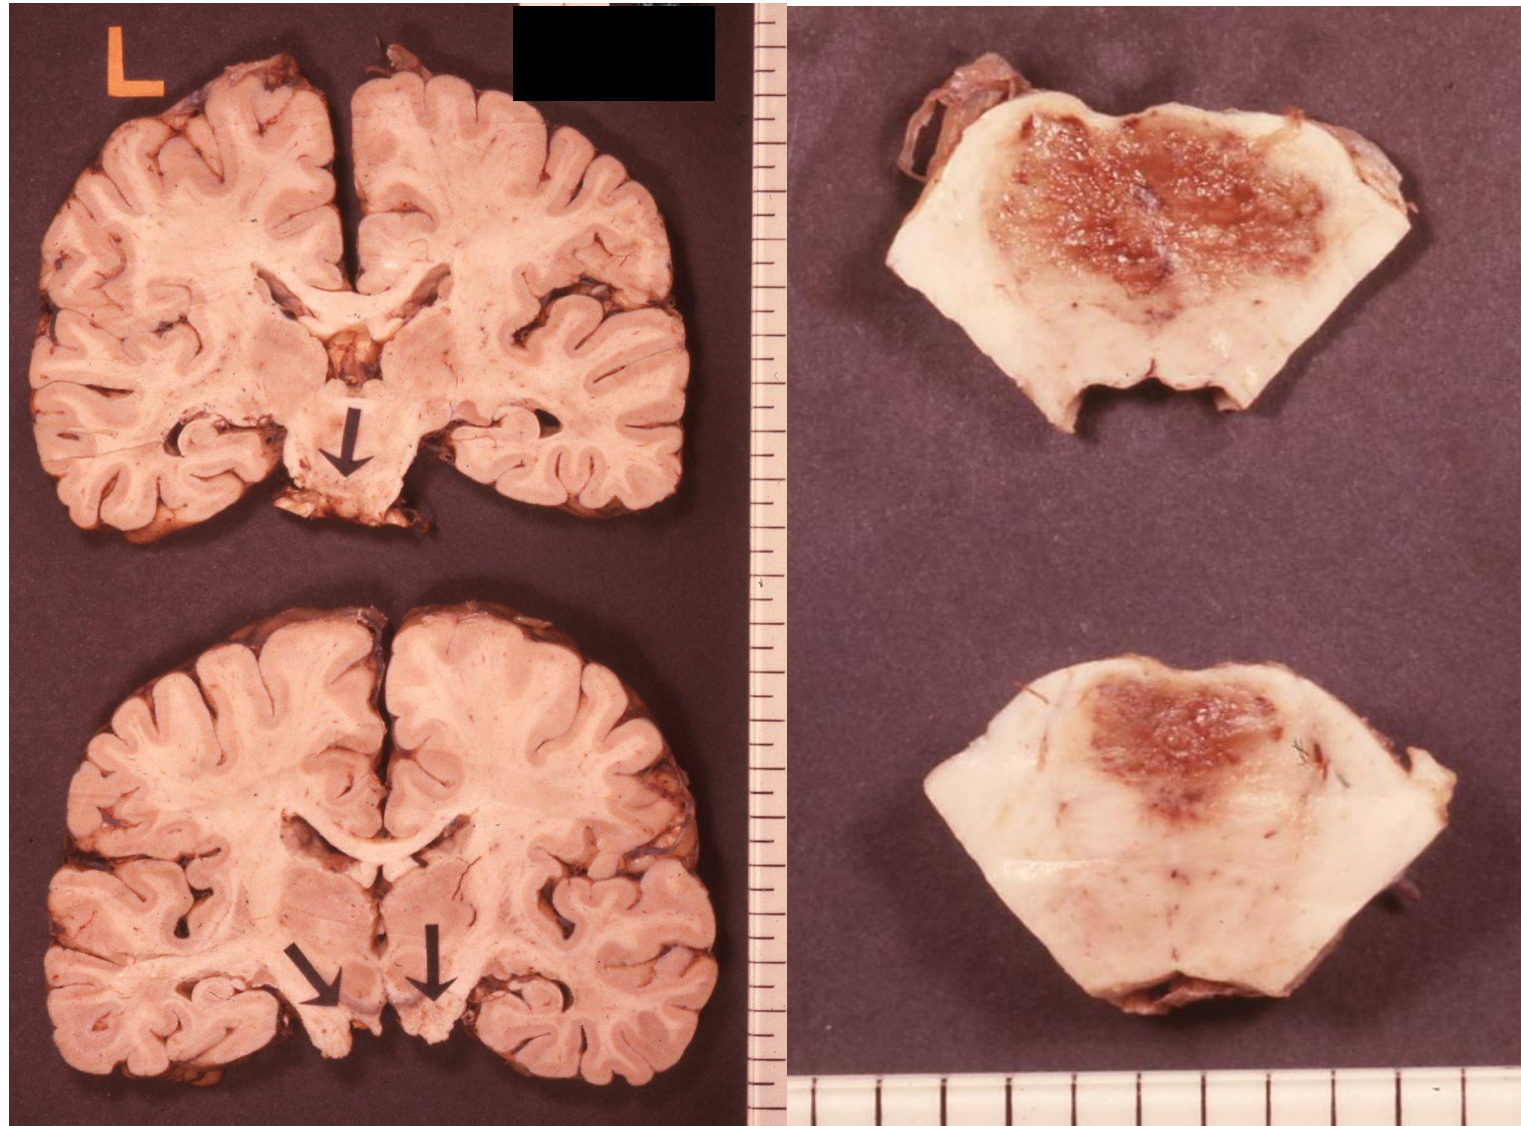

Atherosclerotic thrombotic obstruction of left internal carotid artery (75M)

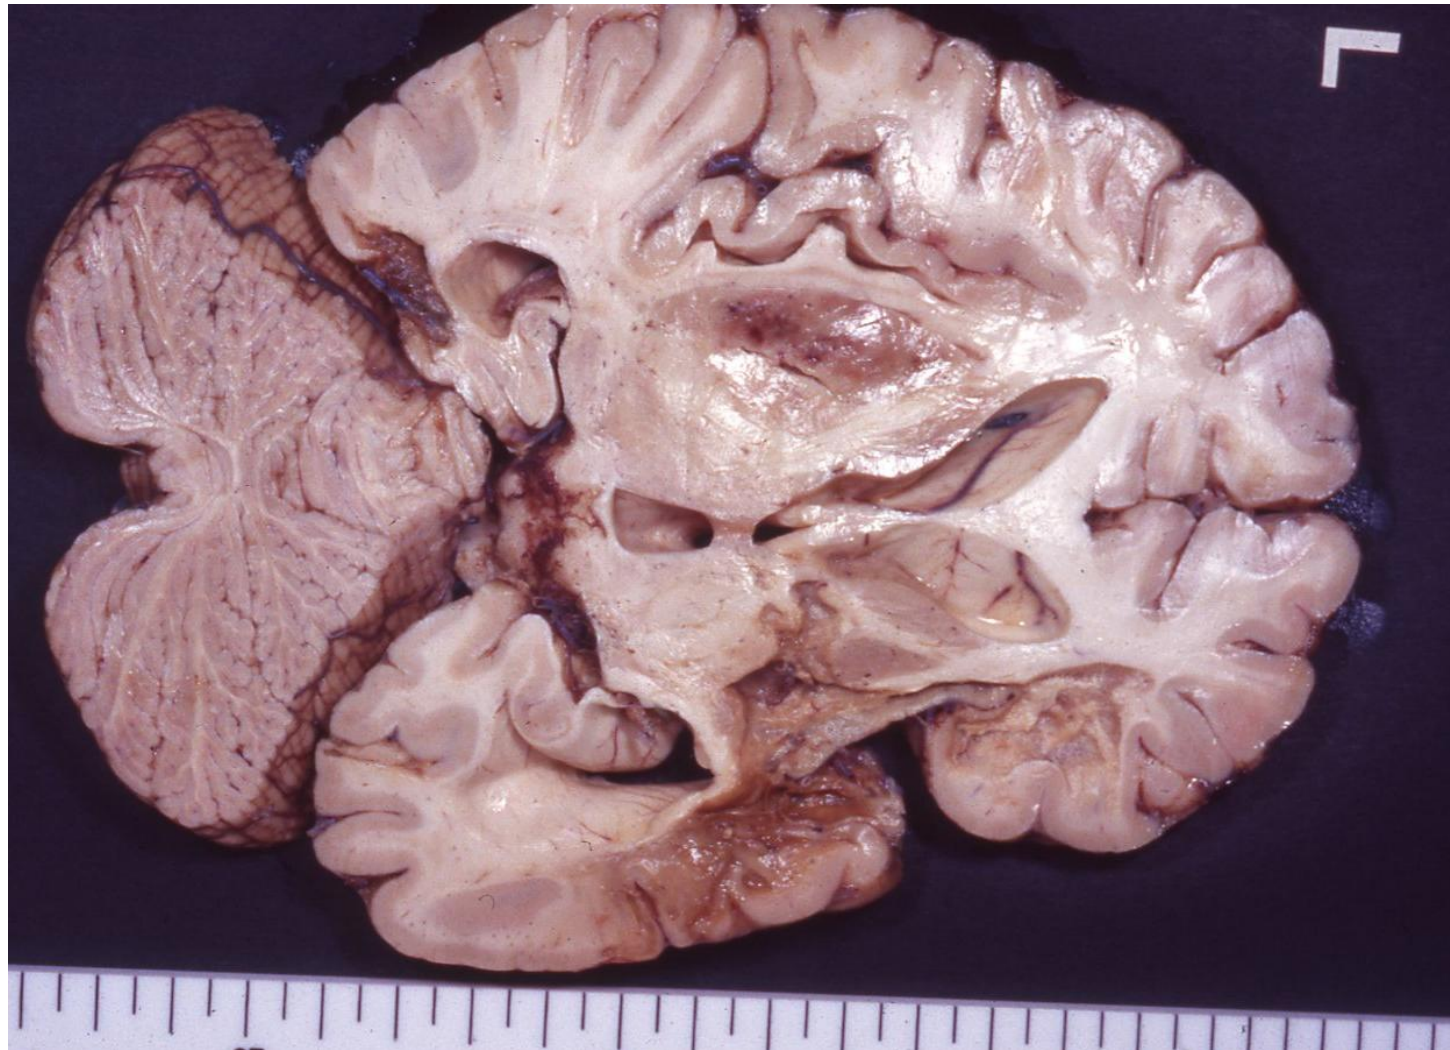

Fresh hemorrhagic brain infarction of right posterior cerebral artery area (72M)

Atherosclerotic stenosis/obstruction of left internal carotid artery and stenosis of basilar artery, causing hemorrhagic infarction of right posterior cerebral artery area (72M)

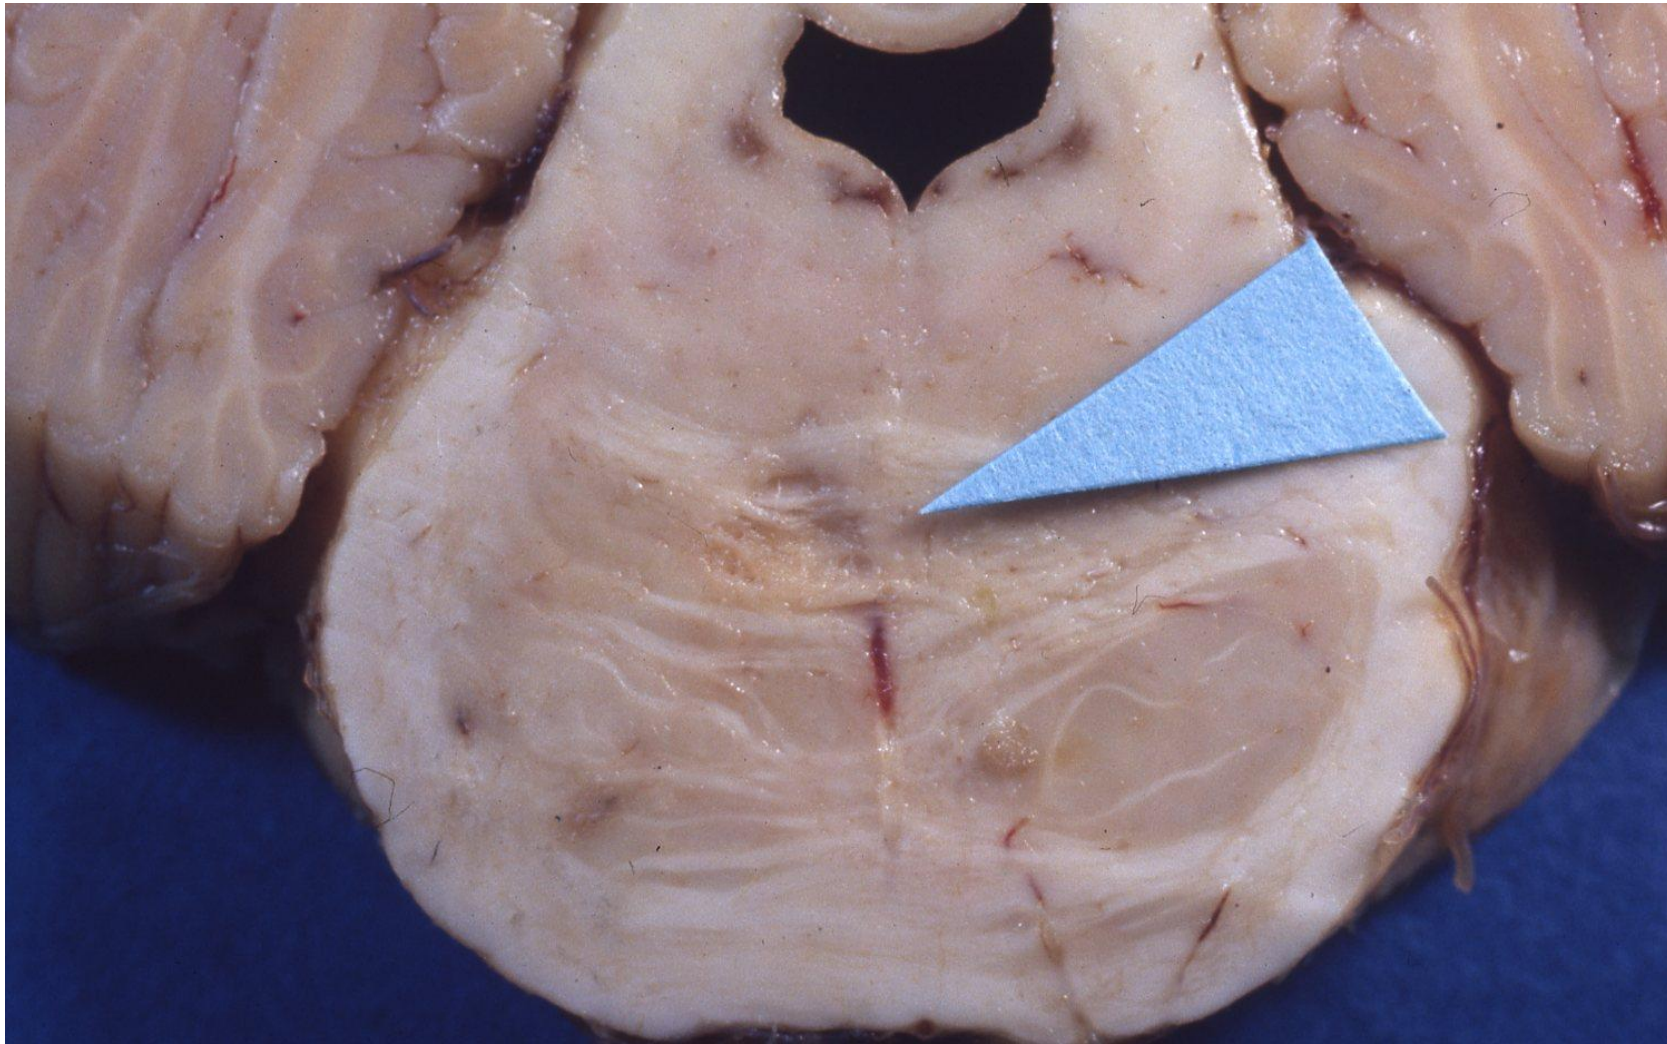

Fresh brain infarction of basilar artery area (80M)

Remote brain infarction of right middle cerebral artery area (74M)

Remote brain infarction of right posterior cerebral artery area (91F)

Remote lacunar brain infarction of pons (71F)
